

# Imagine Earth - Planetary Colonization

Simulation, Strategy/RTS

Imagine Earth is a real-time planet simulation and a build up strategy game. Your job as a space colony manager is to explore and populate distant planets. Build up thriving and profitable colonies on a global scale and trade resources and goods into space. Raise great cities and satisfy their appetite for resources by building power plants, farms and factories.

Expansion & Research

Dig for ideon crystals, pacify riots, research technologies and constructs and maximize your growth while maintaining a healthy ecosystem.

Allies, Threats & Enemies

Get ready to deal with threats like asteroid strikes, twisters, wild fires, volcanoes and rising sea levels. Fend off space raiders and alien investors. Coexist and trade with natives, merchants and hostile colonies.

Capitalist Space Age

In 2048 huge corporations have divided Earth among themselves and exploited its natural resources to a large extent. Now the discovery of ideon crystals allows journeys into space, while technologically and ideologically almost everything remains the same. The laws of the market are being spread into the universe.

## My current needs

Some interesting opportunities to gain visibility.

## Platforms

PC

## Regions

Europe, North America, South America, Australia, Other Western, Japan, China, Korea, India, Other Eastern

## Audience

Midcore

## Game status

First playable
